

Good Clinical Laboratory Practice Online Course

£159

Course Overview

This professionally developed Good Clinical Laboratory Practice (GCLP) online training course provides a clear understanding of the standards and processes required for laboratories analysing clinical trial samples. Designed for sponsors, laboratory managers, project leads, clinical research associates and quality assurance professionals, it supports compliant and consistent laboratory operations aligned with current regulatory expectations.

Participants will explore the principles of GCLP and how it integrates Good Laboratory Practice (GLP) and Good Clinical Practice (GCP) for clinical trial sample analysis. The course covers key areas including laboratory setup and organisation, roles and responsibilities, equipment and facility management, SOPs, quality systems, documentation, sample handling, data integrity, and the reporting of results.

This online training course provides a clear and practical framework for implementing and maintaining GCLP standards in modern clinical research laboratories.

Course Contents:

Module 1:

- Introduction to GCLP
- GCLP Legislation and Guidance
- Laboratory Facilities
- Organisation
- Personnel

Module 2:

- Contracts and Agreements
- SOPs and Instructions
- Protocol
- Equipment
- Materials and Reagents
- Computer Systems
- Conduct of the Work

Module 3:

- Privacy and Confidentiality
- Informed Consent and Blinding
- Quality Control
- Quality Assurance and Audit
- Archiving and Retention of Data

Duration: Approx. 4 hours

As with all of our courses, you are able to take this in your own time, on any device and are able to pause and restart from the place you left off. Time taken will vary depending on your experience and how many of the many optional links and activities you choose to view.
